

Nursing Station and Patient Room

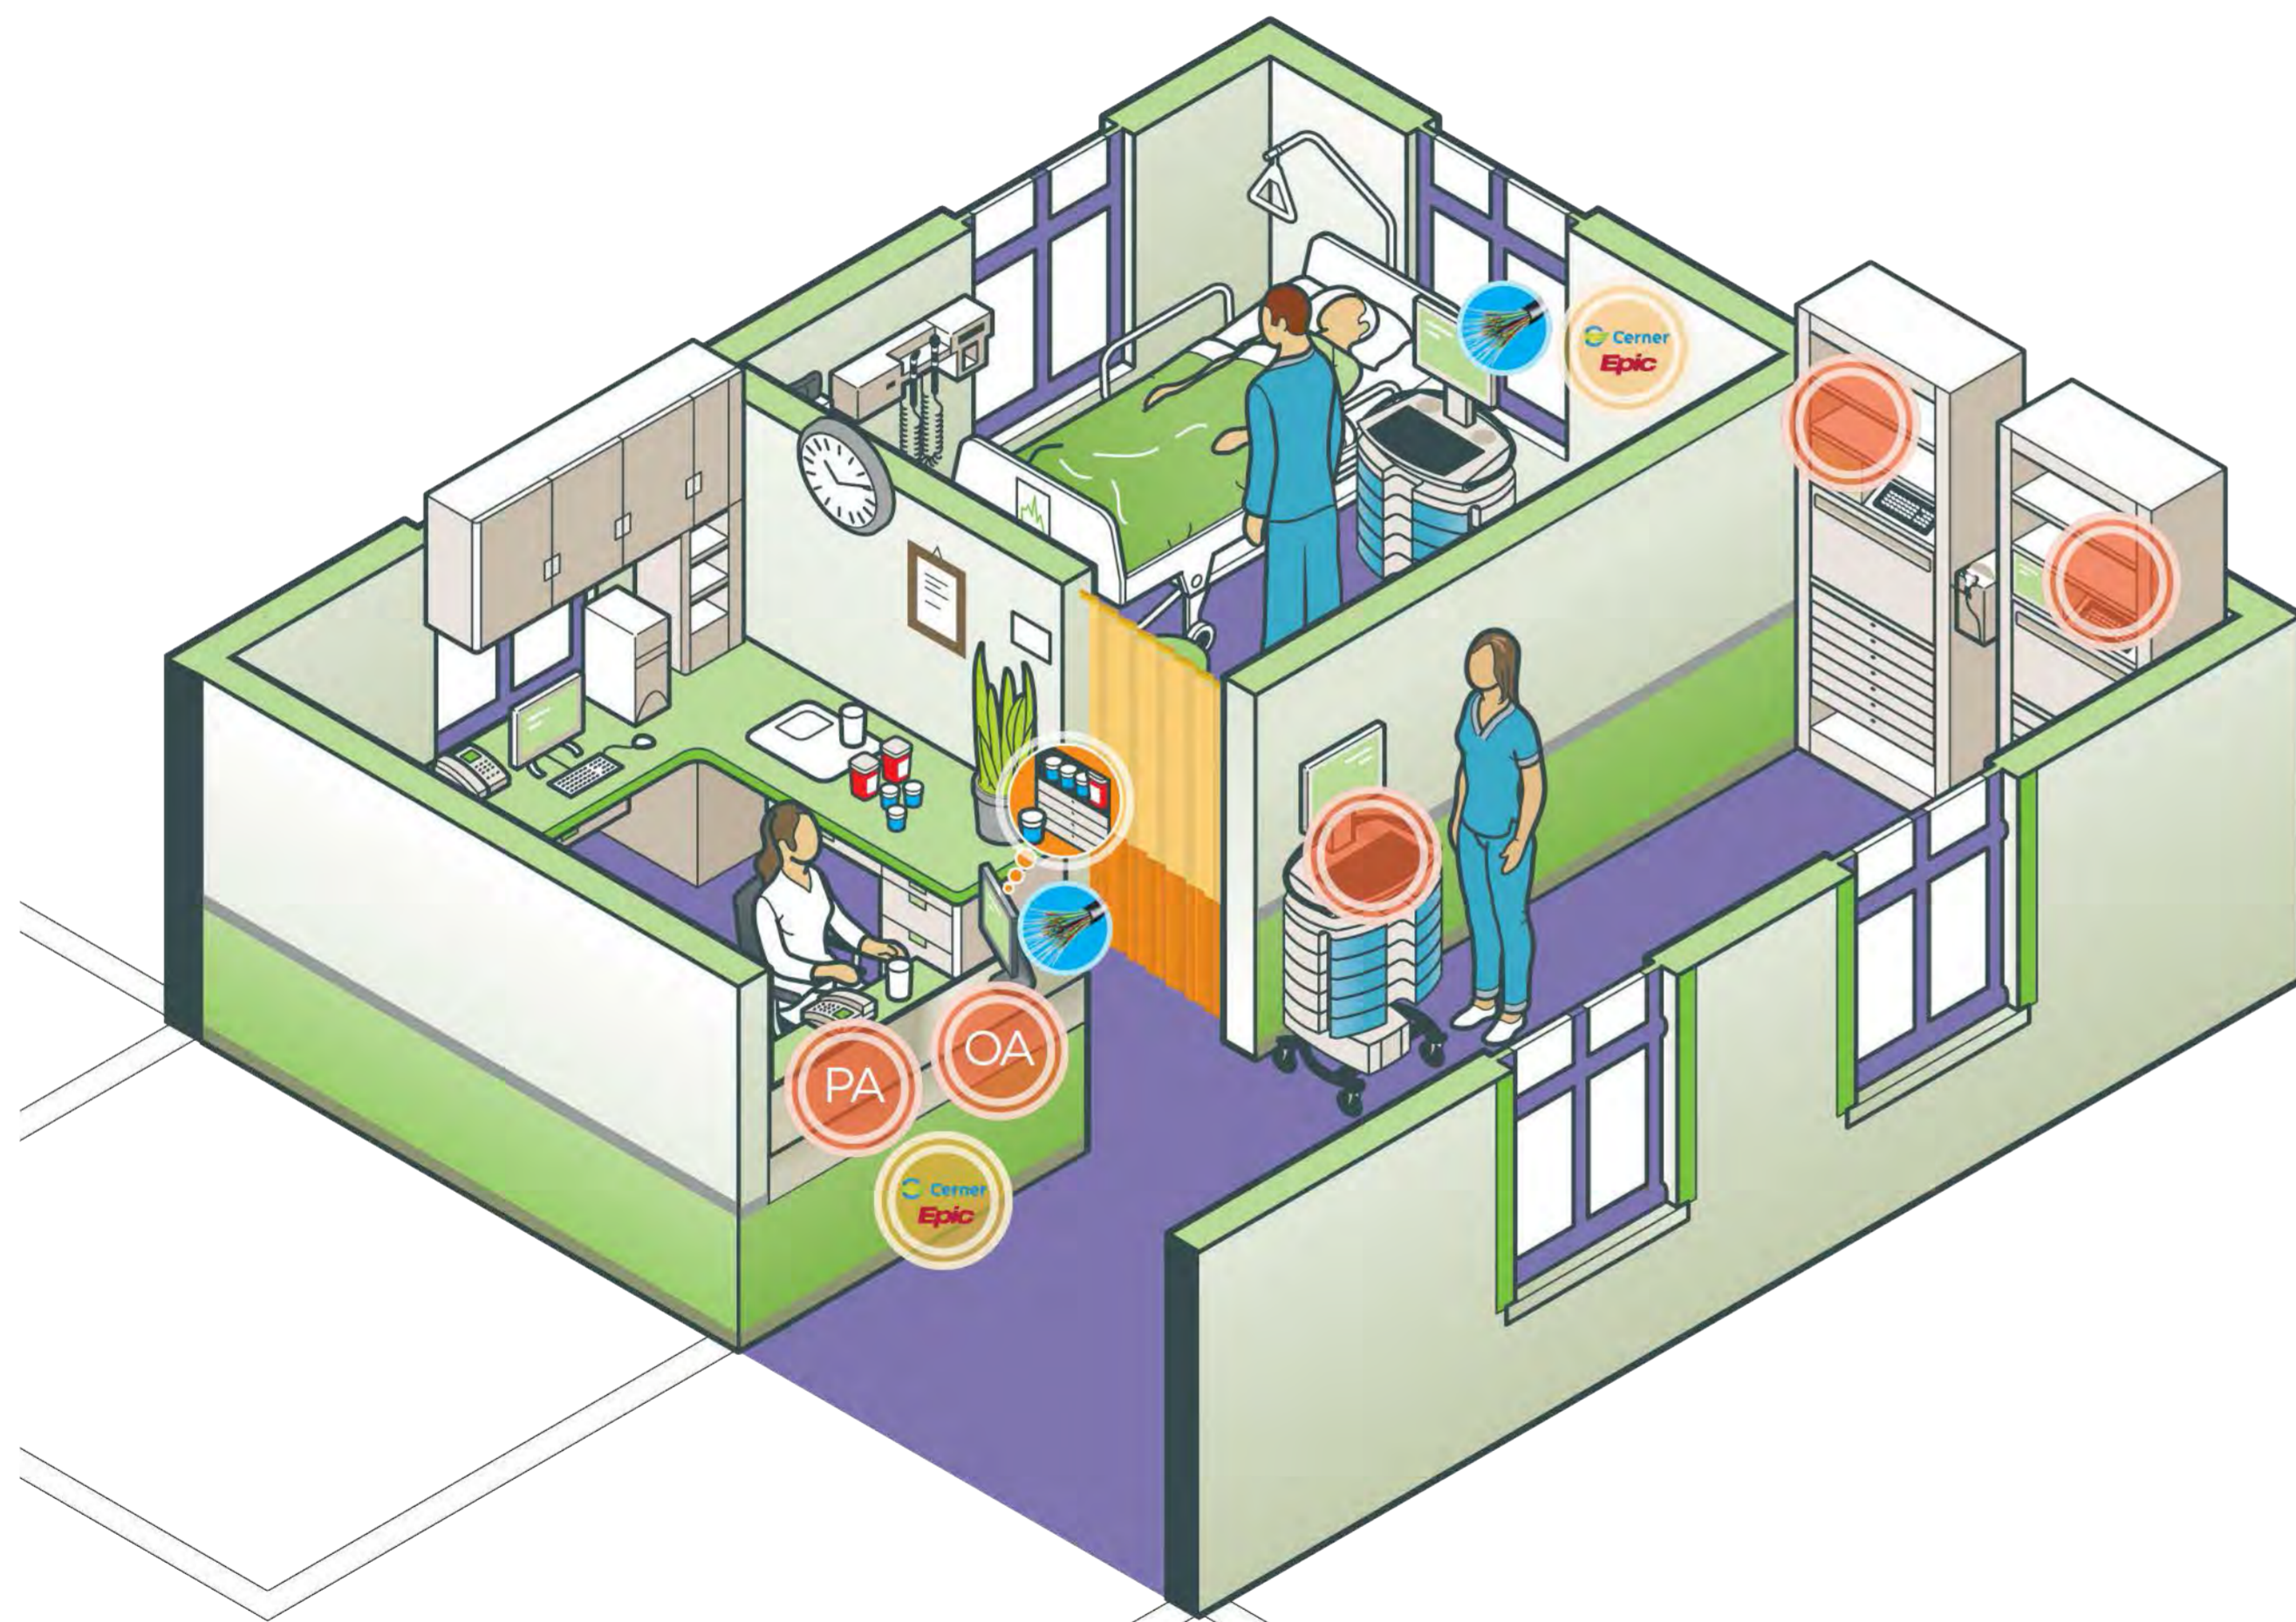

Hospital supplies are often seen as a major source of inefficiency and excess cost

Staff time is spent manually checking par levels and tracking usage in various supply locations. Hospitals are continually challenged to meet the documentation requirements of increasingly stringent Joint Commission mandates and government regulations.

Anywhere RN™

An Innovative Approach to Medication Administration

Anywhere RN remote medication management software gives nurses a flexible way to manage the medication administration process that enhances patient safety as well as staff efficiency.

Simplifies nursing workflows with remote:

- Ordering
- Returning
- Wasting
- Medication overrides

Anywhere RN:

- Minimizes lines at the ADC
- Increases patient safety by reducing interruptions and distractions

Savvy™ Mobile Medication Workstations

Improve Nurse Efficiency

Increase Patient Satisfaction

With Savvy, nurses can make a single trip to the automated dispensing cabinet (ADC) for multiple patients, reducing steps and leaving more time for patient care.

Streamlined Medication Management

- Allows remote requests for ordering, returning, and wasting of medication

Heightened Safety and Security

- Increases medication accountability between the ADC and patient bedside
- Increases safety with patient specific locking drawers—simply scan the patient ID to unlock patient drawer

Cerner Interoperability

Omniceil Integration with EHR Systems

Advanced interoperability between the Omnicell automated dispensing cabinet (ADC) and electronic health record (EHR) saves clinicians steps in medication workflow, so they can administer medication to patients sooner.

Integrated Workflows

Remote ADC functionality is embedded within the Cerner PowerChart® EMR. Directly from the Cerner system, clinicians can:

- Preselect medications
- View availability
- Document waste

This EHR-driven workflow maintains Cerner as the “source of truth.”

Omniceil CareAware iBus Connector

Omniceil Unity is the only advanced enterprise platform with direct, non-interface connection to the Cerner Millennium® EHR via the CareAware iBus.

- Eliminates the need for interfaces
- Speeds implementations
- Reduces testing and maintenance requirements
- Improves system data exchange for enhanced patient safety

RETURN TO THE NURSING STATION

Nursing Station and Patient Room

The screenshot displays the Epic Hyperspace EHR interface. On the left, a medication list for patient 'Remote, John' is shown with columns for medication name, dose, and frequency. Medications include amlodipine, citalopram, dexamethasone, gabapentin, hydrocodone-acetaminophen, and morphine. On the right, the 'Request Med Removal' window is open, showing a table of 'Medications to Remove' with columns for medication, order dosage, intended dosage, issue quantity, and dose due date.

Medication	Order Dosage	Intended Dosage	Issue Qty	Dose Due
amlodipine (NORVASC) tablet 5 mg	5 MG	5 mg	1 TAB	04/22 16:00
citalopram (CELEXA) tablet 20 mg	20 MG PRN	20 mg	1 TAB	Last Issue: 04/21 16:01
dexamethasone (DECADRON) injection 4 mg	4 MG	4 mg	1 VIAL	04/22 16:00
gabapentin (NEURONTIN) capsule 300 mg	300 MG PRN	300 mg	1 CAP	Last Issue: 04/21 16:01
HYDROcodone-acetaminophen (NORCO) 5-325 MG per tablet 2 Tab	2 TAB PRN			Last Issue: 04/21 20:50
morphine injection 7 mg	7 MG PRN	7 mg	1 VIAL	Last Issue: 04/21 20:50

Epic Interoperability

Omniceil Integration with EHR Systems

Advanced interoperability between the Omnicell automated dispensing cabinet (ADC) and electronic health record (EHR) saves clinicians steps in medication workflow, so they can administer medication to patients sooner.

Integrated Workflows

Remote ADC functionality is integrated within the Epic Hyperspace™ EHR. Directly from the Epic system, clinicians can:

- Preselect medications
- View availability
- Document waste

This EHR-driven workflow maintains Epic as the “source of truth.”

Omniceil is the only automated dispensing system vendor to offer such advanced interoperability with Epic’s Hyperspace® EHR.

Omnicell Automated Dispensing Cabinets

Designed to help health care providers meet the challenge of balancing:

- Efficiency
- Regulatory compliance
- Inventory security
- Patient safety

Omnicell Capabilities and Benefits

- Cabinet system shares a database with other solutions on the Unity platform, enhancing efficiency and safety
- Guiding lights technology quickly directs the user to the desired location in the cabinet
- Touch & Go™ advanced biometric ID system provides fast yet secure access
- Server stores up to 7 years of data and supports multiple sites and time zones

Optional: Medication Label Printer

- Allows nurses to print patient-specific labels during medication issue for medications that won't be administered immediately

Nursing Station and Patient Room

Supply Management System

Omnicell Supply Management is an automated system that allows you to manage medical supplies on open shelves and secure automated dispensing cabinets-or both, providing a wide range of benefits:

- Lowers costs by increasing inventory turns and reducing consumption
- Increases revenue-automatically applies charges, eliminating manual entry that is often inaccurate
- Improves control by tracking transaction data, inventory levels, expenses, and treatment costs through a single database
- Improves nurse workflow and patient care by ensuring supplies are readily available

Omnicell Analytics

This robust software solution streamlines the process for managing potential drug diversion across the health system. Omnicell Analytics aggregates OmniCenter data for analysis within an easy-to-use web platform. It focuses on identifying users of high interest based on abnormal trends while reducing the number of false positives.

- Improves diversion detection
- Helps prevent diversion from impacting patient safety
- Supports regulatory compliance

Pandora® Analytics

Omnicell Pandora Analytics provides simple, customizable dashboards with key performance indicators. Pandora aggregates medication data across all Omnicell products, providing greater visibility to improve decision making. The expanded integration makes it a more powerful tool for prioritizing action items.

- Identify suspicious activity for potential drug diversion
- Track operational performance and assess improvement
- View total inventory costs of medications and supplies
