

Development of the Vital Sync platform launched in China to support patient monitoring as part of connected devices [respiratory systems etc.]

Vital Sync-Virtual Patient Monitoring Platform

[Know sooner... Act now.]

PREVENT THE PREVENTABLE

Be by your patients' side — wherever you are

Vital Sync™ VPMP

Vital Sync™ Virtual Patient Monitoring Platform

The Vital Sync™ software-based platform sends data from bedside monitoring devices to your mobile devices, Workstation on Wheels, Central Nurse Station and sends it to your hospital's EMR, CIS and alarm forwarding systems.

Vital Sync™ virtual patient monitoring platform may enhance patient safety by enabling clinicians to detect clinical distress remotely, so they can respond faster to the changing needs of patients.
